

SDIC Monthly Managers Report

10/8/2026

Infrastructure & Field Operations:

-The North Pump ditch system was cleaned of weeds and accumulated sediment. This included 1800' feet of primary ditch system that flows directly to the pump station and 5000' of secondary ditch systems. To increase efficiency the contractor used two types of excavators, one long reach and one standard. The previous spoils were also bulldozed level prior to digging. The project came in about \$6000 under budget.

-I was notified by Farnham Electric, who is the contractor for the Evans Pump Station backup generator project, that the electrical transfer switch has been delayed again by the manufacturer. The updated delivery date is now around the first week of November.

-The Jackson Creek Diversion was cleaned of accumulated sediment.

Pumping and Water Control Operations:

-The Santosh and Evans sloughs are being maintained below the 4.4' water level using the North Tide Gates.

-The North, Cherry, Sternberg, Johnson, Smith and Honeyman pumping stations are operating at 1.5'-2.0' water level.

-The Kessi pump station is off and the back flow valve has been opened for irrigation.

Infrastructure & Operations-Looking Ahead / Action Items:

-24" Culvert removal in sub levee.

-Tree removal near Jackson Creek Diversion

-Evans Pump Station Electrical Transfer Switch Installation

-Herbicide application

-Levee Toe/Rip Rap Inspection

Personnel:

-

408's:

-I have not received any updates since our September board meeting on the Heidelberg/Ellis gravel mine 408.

Accreditation / LOMR:

-WEST has completed the updated MT-2 LOMR application for submittal to FEMA.

-The City of Scappoose used their internal GIS mapping system with the updated interior drainage maps to generate a list of affected landowners. Those landowners were separated into two groups, city or county, depending on the location of their properties. Once the notices are mailed it will determine the date and time for the public open house. Once the open house is completed and the application has been submitted, it is estimated to take around six months for FEMA to complete their review.

General-Admin-Best Practices:

-Our website hosting service Streamline has sold to Network Solutions and the new subscription price has increased substantially. We were able to find several options to host our website at a much lower cost. I am hoping to complete the changeover before the next meeting.
